Project Structure

Create a Project folder that contains files as shown below

A screenshot of a file explorer window with a dark theme. It shows a directory tree for a project. The 'Dataset' folder is expanded, showing 'TEST_SET' and 'TRAIN_SET' subfolders. The 'Flask' folder is also expanded, showing 'Sample_Images', 'static', 'templates', and 'uploads' subfolders, and 'app.py', 'nutrition.h5', and 'requirements.txt' files. A 'training' folder is at the bottom.

- Dataset folder contains the training and testing images for training our model.
- We are building a Flask Application that needs HTML pages stored in the templates folder and a python script app.py for serverside scripting
- we need the model which is saved and the saved model in this content is a nutrition.h5
- templates folder contains home.html, image.html, imageprediction.html pages.
- Statis folder had the css and js files which are necessary for styling the html page and for executing the actions.
- Uploads folder will have the uploaded images(which are already tested).
- Sample_images will have the images which are used to test or upload.
- Training folder contains the trained model file.
